control

NEW IoT

ValueBox Control.
Intelligent storage.

New ValueBox Control enables staff and organisations with high volumes of passengers and services to simplify administration and improve security for sensitive or expensive equipment and personal belongings. Although just as compact, its updated design now makes it possible to store bags, laptops, projectors, cameras and other large items with the same high level of security as the company's keys.
When someone needs to borrow equipment for a meeting or conference, the administrator does not need to be there to sign it out. The ValueBox system can be managed from anywhere and any computer or tablet using the KeyWin6 administration tool. Highest possible security and unparalleled versatility.

KEYWIN6

KeyWin6 is the latest version of the market's most comprehensive administrative tool for securely managing keys and valuables. One or more administrators can manage key cabinets and keys with the highest possible precision, from anywhere in the world. Choose between the KeyWin6 IoT cloud service based on IoT technology through Microsoft Azure or an on-premises software installation depending on your needs.
